Sir:

Prior to examination on the merits, please amend the above-captioned application as follows:

**IN THE CLAIMS:**

Please add new claim 27 as follows:

--27. (New) An image input system, comprising:

a plurality of measuring units for measuring an object and for generating shape data of the object, the measuring units being disposed at a plurality of positions relative to an axis associated with a position of the object;

a calculating unit for calculating coordinate transformation information based upon a plurality of shape data obtained from different points of view of the object obtained by the measuring units disposed at the plurality of positions, said coordinate transformation information including a position of the axis; and

a processing unit for synthesizing at least some of the plurality of shape data in accordance with the calculated coordinate transformation information.--
